

Did you know you get easy profit by adding **Intra Hydropure** to the water?

## INTRA HYDROPURE: THE PUREST WATER FOR HEALTHY CROPS

Good water quality is essential for sustainable production and healthy crops. Pathogenic fungi, bacteria and viruses spread easily through the irrigation system. Pathogens will hide and proliferate inside the biofilm which can build up easily. A low and continuous dosage of Intra Hydropure, an ultra-stabilised hydrogen peroxide, ensures 100% guaranteed clean irrigation systems and simultaneously eliminates pathogenic microorganisms.

## 6 REASONS TO CHOOSE INTRA HYDROPURE

- ✓ Removes organic and microbiological contamination until the last dripper
- ✓ Less production losses, more yield
- ✓ Continuously increased oxygen level in the irrigation water
- ✓ Less nutrient losses, stable pH
- ✓ Limits use of crop protection products
- ✓ Approved product for organic farming

1 L Intra Hydropure produces **200 L OF OXYGEN** to brush the irrigation system

Improved hygiene results in **IMPROVED YIELD/M<sup>2</sup>**

Excellent root development due to **15% MORE OXYGEN** in the water

INTRA HYDROPURE IS REGISTERED AS BIOCIDES FOR IRRIGATION SYSTEMS AND GREENHOUSES

Intra Hydropure improves your hygiene for future proof growing
