

Superior foam to remove mineral deposits

THE POWER OF DISINFECTION START CLEANING

Cleaning mineral deposits is essential for optimal biosecurity. Without proper cleaning, disinfectants are ineffective. It has been proven that microorganisms can survive beneath mineral deposits on gutters. To remove these deposits, an optimally formulated cleaner, such as Intra Clean Minerals, is indispensable.

5 REASONS TO CHOOSE INTRA CLEAN MINERALS

- ✓ Excellent foaming properties for deep and effective action
- ✓ Strong adhesion to vertical and horizontal surfaces with extended contact time
- ✓ Removes mineral deposits and prepares the surface for disinfection
- ✓ Highly effective and safe for materials
- ✓ Biodegradable

Effective cleaning
removes **99.9%** of
microorganisms

A foam adheres better
to vertical surfaces and
INCREASES
contact time

NON-CORROSIVE
and safe for hardware
and equipment

PROPER CLEANING CONTRIBUTES TO SUSTAINABLE GREENHOUSE PRODUCTION

INSTRUCTIONS

Use 3-5% Intra Clean Minerals (3L per 100L of water)

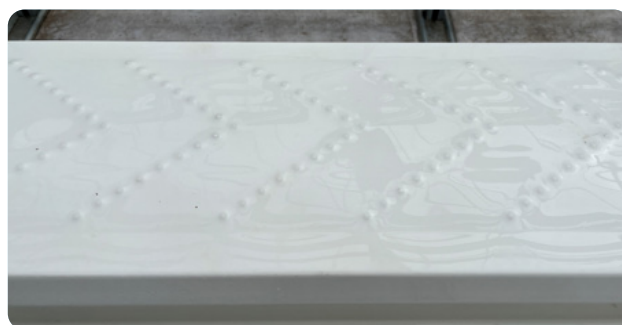

- 1 Apply foam using a foam lance
- 2 Foam on gutters, tables, and floors
- 3 Rinse after 30-60 minutes

RESULTS

Before Intra Clean Minerals

After Intra Clean Minerals

"Pathogens can hide beneath mineral deposits and multiply rapidly during cultivation, causing disease. Ensure a perfectly clean and disinfected surface to prevent this."
