

Superior foam to remove mineral deposits

THE POWER OF DISINFECTION IS CLEANING

Removal of all mineral deposits is key to ensuring optimal biosecurity. Without cleaning, disinfectants would be rendered useless against all the dangerous pathogens lurking in the surfaces. It is found that beneath mineral deposits on the gutters micro-organisms can survive. To remove these mineral deposits, an optimally formulated cleaning agent, such as Intra Clean, is essential.

5 REASONS TO CHOOSE INTRA CLEAN

- ✓ Excellent foam properties for in depth action
- ✓ Ensures good adhesion for optimal power on vertical surfaces
- ✓ Removes mineral deposits and prepares the surface for disinfection
- ✓ Highly effective and safe for materials
- ✓ Biodegradable

Effective cleaning
removes **99.9%** of
microorganisms

A foam adheres to
vertical surfaces better
and **INCREASES**
contact time

NON-CORROSIVE
and safe for hardware
and equipment

PROPER CLEANING CONTRIBUTES TO SUSTAINABLE GREENHOUSE PRODUCTION

Intra Clean Minerals improves your hygiene
for **future proof growing**

INSTRUCTIONS

Use 3% Intra Clean (3 L / 100 Litre water)

- 1 Foam with foaming equipment
- 2 Foam on gutters, tables and floors
- 3 Rinse after 30-60 minutes

RESULT

Intra Clean Minerals

Industrial standard product X

"Pathogens can hide underneath the mineral deposits and strike in the new production cycle. Make sure to perfectly clean the surface."
